PROCUREMENT SECTION
GRAIN STOCKS ABOVE YEAR AGO

Stocks of grains on July 1, 1972 were above a year earlier except for soybeans and flaxseed, according to the Crop Reporting Board. Large increases were noted in corn, sorghum grain, wheat, and rye. Stocks of the four feed grains (corn, oats, barley, and sorghum) totaled 81.7 million tons, 35 percent more than July 1, 1971. Feed grain disappearance during April-June totaled 44.0 million tons, 17 percent more than for the same quarter in 1971.

Stocks of all wheat were 19 percent more than a year earlier with durum stocks up 29 percent. Rye stocks were 61 percent above a year ago. Soybean stocks were 18 percent below a year earlier and flaxseed stocks were down 26 percent.

Old crop carryover of all wheat on July 1 totaled 865 million bushels, 19 percent more than a year earlier, but 2 percent less than July 1, 1970. Off-farm holdings of 509 million bushels were 4 percent more than a year earlier and farm holdings, at a record high of nearly 357 million, were up 49 percent. Stocks in all positions on July 1 indicate disappearance during the July 1, 1971 to June 30, 1972 crop year of 1,504 million bushels, compared with 1,525 million a year earlier and 1,394 million 2 years ago. Disappearance for April-June 1972 was 348 million bushels, compared with 333 million a year earlier. The Commodity Credit Corporation owned 367 million bushels of the total wheat stocks and had loans outstanding on 349 million.

Old crop durum wheat stocks in all positions on July 1 totaled 69.2 million bushels, 29 percent more than a year earlier but 11 percent below 2 years ago. Farm holdings of 48.5 million were 31 percent above last year, and off-farm stocks were up 23 percent. Disappearance during the crop year ended June 30, 1972, is indicated at 72.3 million bushels, compared with 74.5 million a year earlier.

Old crop rye stocks in all positions on July 1 totaled 45.1 million bushels, 61 percent greater than a year ago and the largest for the date since 1943. Farm stocks, at 11.4 million bushels, were up nearly five-fold from July 1, 1971 and off-farm stocks of 33.7 million bushels were 32 percent greater than a year ago. Indicated disappearance during the 1972 April-June quarter was 4.2 million bushels, compared with 6.8 million a year earlier. The Commodity Credit Corporation owned 32.0 million bushels of old crop rye on July 1 with loans outstanding on another 9.7 million bushels.

Corn in all storage positions on July 1, 1972, totaled 2,176 million bushels, 39 percent more than a year earlier and 13 percent more than July 1, 1970. Off-farm stocks of 609 million bushels were 55 percent more than a year earlier and farm holdings, at nearly 1,568 million bushels, were up 34 percent.

Indicated disappearance from all positions during April-June was 1,168 million bushels, compared with 964 million during the same quarter a year earlier. The Commodity Credit Corporation owned 155 million bushels of corn stocks on July 1 and had loans outstanding on another 860 million bushels.

Old crop oat carryover stocks in all locations on July 1 totaled 549 million bushels, a record high for the date. Holdings exceed the previous record of a year earlier by 7 percent. Off-farm holdings of 216 million bushels are a new high for July 1 (16 million above the previous record of last July 1), and farm supplies of 333 million bushels (the second highest on record since 1926) are 22 million bushels above last July 1.

Disappearance during the past April-June quarter was 182 million bushels, 4 percent less than the 190 million during the same 1971 period. The Commodity Credit Corporation owned 186.5 million bushels of old crop oat stocks as of July 1 and had loans outstanding on another 194.4 million bushels.

Old crop barley holdings in all storage positions totaled 174 million bushels on July 1, 1972, 11 percent more than a year earlier but 26 percent less than July 1, 1970. Of total old crop barley stocks, the Commodity Credit Corporation owned 23 million bushels and had loans outstanding on another 78 million bushels. Off-farm stocks totaled 68 million bushels, 10 percent less than a year earlier and 33 percent less than July 1, 1970. Farm stocks, at about 107 million bushels, were 31 percent larger than last July 1, but 22 percent less than July 1, 1970. North Dakota and Minnesota accounted for 66 percent of U. S. farm stocks. Total disappearance during the 1972 April-June quarter, at 109 million bushels, was 8 million more than during the same period a year earlier.

Sorghum grain stored in all positions on July 1, 1972 totaled 277 million bushels, 56 percent above the amount on hand a year earlier but 21 percent below July 1, 1970 holdings. Off-farm stocks are 48 percent above a year ago and account for 75 percent of total sorghum stocks. Sorghum holdings on farms are nearly double last year's total.

July 1 stocks indicate an April-June disappearance of 206 million bushels, 15 percent above the amount used during last year's spring quarter. Poor pastures in the Southwest kept sorghum grain in demand for feed. The Commodity Credit Corporation owned 46 million bushels and had loans outstanding on an additional 99 million.

(Continued on page 16.)

Soybeans in storage at all positions on July 1, 1972 totaled 232 million bushels, 18 percent less than a year earlier. At 58 million bushels, farm stocks were 36 percent below last year while off-farm stocks of 174 million bushels were down 9 percent. The Commodity Credit Corporation owned no soybeans but had loans outstanding on 33 million bushels.

July 1 stocks indicate a disappearance during September-June of 1,036 million bushels from a beginning supply of 1,268 million bushels. Disappearance during the same period a year earlier was 1,072 million bushels. During the past 10 months, approximately 604 million bushels of soybeans were processed for oil, around 366 million bushels were exported, and about 52 million bushels were used to seed the 1972 crop.

The April-June disappearance was 319 million bushels, 5 percent below the 334 million for the same period a year earlier.

Old crop flaxseed holdings in all storage positions on July 1, 1972 totaled nearly 20 million bushels, 26 percent below last July 1 and 9 percent under July 1, 1970. Off-farm stocks, at 17.3 million bushels, account for 87 percent of total holdings and are down 27 percent from last July 1. Farm stocks are down 20 percent. The Commodity Credit Corporation owned 18 million bushels and had loans outstanding on slightly over 1 million bushels.

July 1 stocks indicate a disappearance of 25.6 million bushels for the year ended June 30 from a supply of 45.5 million bushels (carryover of 26.8 million bushels plus 1971 production of 18.7 million bushels). Crushings are estimated at 20.6 million bushels and exports at 1.8 million for the period from July 1, 1971 to June 30, 1972. About 1.0 million bushels were used to seed the 1972 crop.
